

# Product Specification Sheet

The **Contain-A-Lock® Padlock Protector & Lock** is a heavy-duty, high-security solution that's easy to use and highly effective at deterring theft and tampering.

Ideal for **self storage operators** or anyone securing valuable items in a container. It has a **built-in lock retention system** and comes with the top-rated, high quality **CISA 285/75 padlock** to maximise security.

## Benefits and Use:

- **Lock retention** – padlock hangs securely inside the shroud, preventing loss when accessing the container.
- **User-friendly design** – quick and easy to operate.
- **Corrosion-resistant** – built to withstand harsh weather conditions.
- **Tamper-resistant** – engineered to prevent unauthorised access.
- **Strong visual deterrent** – discourages theft.
- **Clean appearance** – blends well with any container setup.
- **Maintenance-free** – designed for long-term reliability.

## Specifications and Features:

- It's made from **heat-treated 4mm steel** for cut resistance and durability.
- **A highly corrosion-resistant** finish for long-lasting protection in harsh environments.
- Its slim, low-profile design minimises access to the padlock, making it **extremely difficult to tamper**.
